Product overview

Product overview

Single drum vibratory rollers

Water tank

Standard on BW 55 and BW 71

- Removable with a large filling port for easy water supply on site
- Corrosion-free for an extended service life
- High efficiency: spraying system mounted on the tank for the drums

Product overview

Single drum vibratory rollers

Operation

- Everything in the driver's hands: speed, engine speed, and vibration
- Height adjustable
- Collapsible (BW 55)
- Key safety features
- 2 travel ranges and brake on the steering rod (BW 71)

Product overview

Single drum vibratory rollers

Drive

- Maintenance-free mechanical drive
- Superior surface quality provided by the large drum diameter
- One drum: simple to load and easy to turn
- Optional support wheels for added safety and surface quality (BW 71)

Product overview

Double vibratory rollers

Start device

- Simple and safe: electronic starter and emergency starter as standard

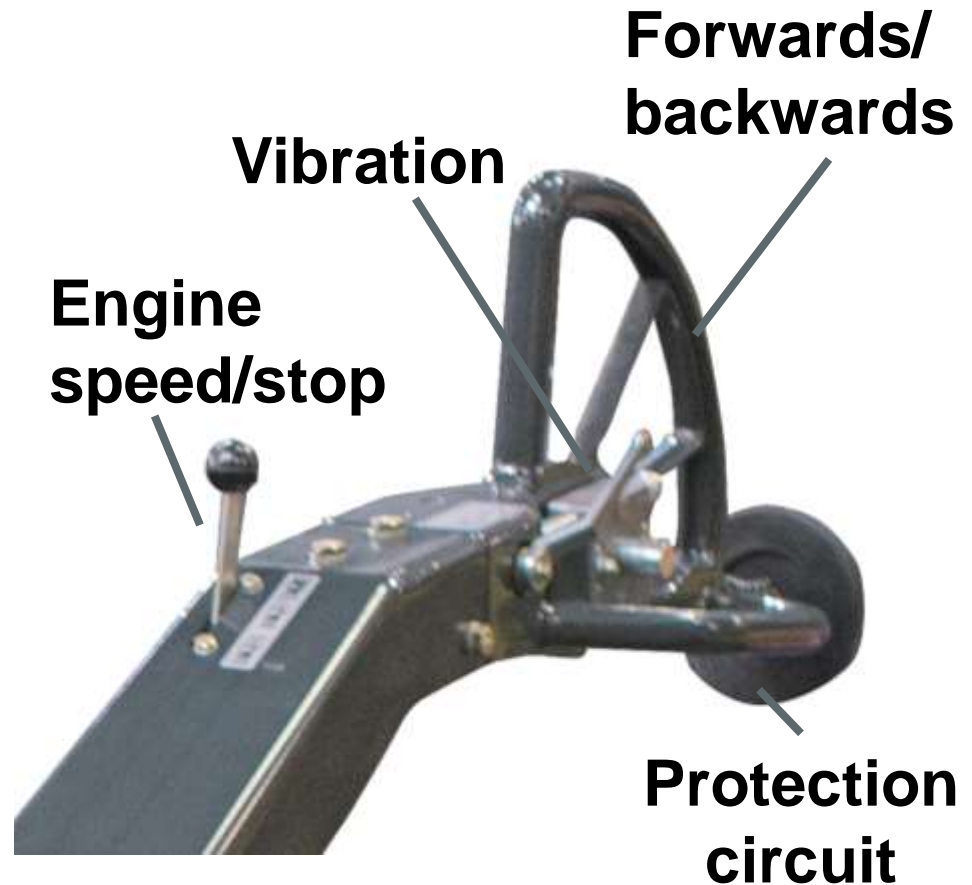

Product overview

Double vibratory rollers

Operation

- Engine speed and stop on the operating console
- Ergonomic vibration switch and speed control
- Safety switch triggered at low force levels (optional as standard in the EU)
- Vibration-dampened to protect the operator and provide consistent long-term compaction results

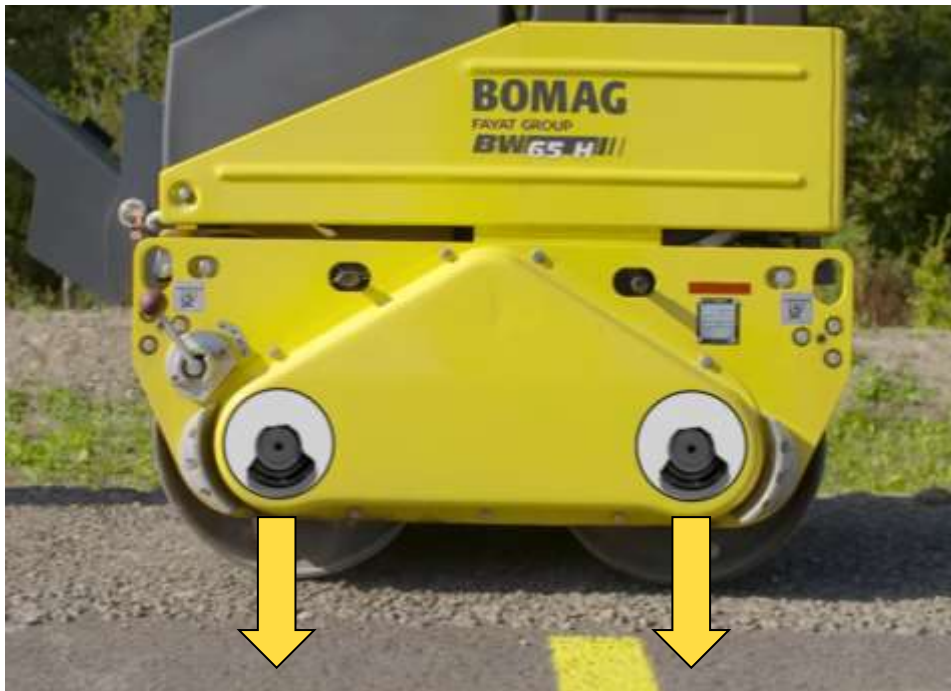

Product overview

Double vibratory rollers

Exciter and drive

- Both drums with exciter and forward drive = superior power and gradability.
- Easy access along walls and kerbs with minimal overhang on one side
